

Car Care Video Script

Fuel Savings

GAS is EXPENSIVE!

But you can get make the most out of what you're paying for. *(Kelly)*

Here are the KEYS to fuel saving.

When the temperature drops
so does your tire pressure.

So CHECK your tires.

Make sure the pressure is correct,

The handling of your car

and your mileage will be better. *(Kelly)*

Make sure your engine is WELL maintained.

A POORLY maintained engine can use up to 50 PERCENT more fuel! *(Kelly & Mechanic)*

Remove all snow and ice.

It's a SAFETY hazard

And it also creates aerodynamic drag.

You'd be SUPRISED

how many people forget to turn OFF the parking break.

You lose about 2 kilometers per liter with the parking break on.

So DOUBLE check! *(Kelly)*

It's UNBELIEVABLE,

but 17 percent of the cars on the road

DON'T have a gas cap.

And there are plenty more that are cracked

or don't seal properly. *(Kelly)*

A cap costs about 8 dollars

And prevents fuel from evaporating! *(Kelly)*

Bottom line

a properly maintained vehicle will save you headaches – and money *(Kelly)*
