

Car Care Video Script

Idling

You may not think about those minutes in the day when you idle your engine.

But as your engine runs, it releases greenhouse gases which adds to our pollution and, climate change problems.

It's a HEALTH issue as well!

Idling

And it all adds up.

With gas prices hovering around a dollar a litre
leaving your engine idling for only 10 seconds a day, every day
For a year, It could cost you around \$100 in wasted fuel.

Gone. Out of your wallet

Now think about how LONG you wait at the drive thru.
PARK INSTEAD, you can pay for your meals with the SAVINGS!

Some people are concerned about turning off and on their car
thinking it's bad for the engine.

Not true!

Others say

"On cold mornings I warm up my car for a while.
It's better for the car."

Well actually
Your engine only needs 30 seconds to get itself revving',
the time it takes to clear away the snow from your car.

So no more excuse!

STOP IDLING!
